Subject Index

Adaptive Estimation Procedure

Gloudemans, Robert J. Modeling commercial properties under various economic conditions. March: 25–41.
Ireland, Michael W., and Linda Adams. Transportability of a general-purpose residential market-calibrated cost model. June: 203–24.

Adjustments (to assessed values)

Epstein, Sheldon, and Yonah Wilamowsky. The impact of a substantial shift in property taxes on the revaluation process. September: 331–44.

Appreciation Rates

Soskin, Mark D., Bradley M. Braun, and William C. Weaver. A time differentiation approach to housing markets: A case study of Orange County, Florida. December: 393–402.

Artificial Neural Networks

Borst, Richard A. Artificial neural networks: The next modeling/calibration technology for the assessment community. March: 69–94.

Assessment Administration

Bogart, William T. Economic implications of tax administration: Property assessment, equalization, and school aid in New Jersey. December: 377–92.
Epstein, Sheldon, and Yonah Wilamowsky. The impact of a substantial shift in property taxes on the revaluation process. September: 331–44.
Moffie, Robert P., and Tracy L. Williamson. An examination of factors affecting payment of property taxes within a discount period. December: 409–14.
Sherrill, Koren, and Elbert B. Whorton, Jr. Sample size estimation techniques of the state equalization study of school districts in Texas. March: 125–39.
White, Pip. Residential housing market analysis: A turning points model. June: 147–56.

British Columbia

Hamilton, S. W., and David Dale-Johnson. Multiple listing service sales data as an indicator of market behavior: Prices, volume, and submarket activity. June: 175–97.

White, Pip. Residential housing market analysis: A turning points model. June: 147–56.

Commercial Models

Gloudemans, Robert J. Modeling commercial properties under various economic conditions. March: 25–41.

Gloudemans, Robert J. MRA and the valuation of public service companies. March: 43–67.

O'Connor, Patrick M., John G. Panos, and Siddhartha Som. Manhattan commercial property: Development and comparison of valuation models. March: 3–23.

Computer-Assisted Mass Appraisal

Borst, Richard A. Artificial neural networks: The next modeling/calibration technology for the assessment community. March: 69–94.

Gloudemans, Robert J. Modeling commercial properties under various economic conditions. March: 25–41.

Gloudemans, Robert J. MRA and the valuation of public service companies. March: 43–67.

Ireland, Michael W., and Linda Adams. Transportability of a general-purpose residential market-calibrated cost model. June: 203–24.

Jensen, David L. Modeling time effects in computer-assisted mass appraisal. March: 95–123.

O'Connor, Patrick M., John G. Panos, and Siddhartha Som. Manhattan commercial property: Development and comparison of valuation models. March: 3–23.

Cost Models

Ireland, Michael W., and Linda Adams. Transportability of a general-purpose residential market-calibrated cost model. June: 203–24.

Equalization

Bogart, William T. Economic implications of tax administration: Property assessment, equalization, and school aid in New Jersey. December: 377–92.

Sherrill, Koren, and Elbert B. Whorton, Jr. Sample size estimation tech-

niques of the state equalization study of school districts in Texas. March: 125–39.

Environmental Issues

Kinnard, William N., Jr., Philip S. Mitchell, Gail L. Beron, and James R. Webb. Market reactions to an announced release of radioactive materials: The impact on assessable value. September: 283–97.

General Purpose Model

Ireland, Michael W., and Linda Adams. Transportability of a general-purpose residential market-calibrated cost model. June: 203–24.

Hedonic Model

Des Rosiers, Francois. RESIVALU: An hedonic residential price model for the Quebec region, 1986–87. June: 227–55.

Housing Markets, Analysis of

Soskin, Mark D., Bradley M. Braun, and William C. Weaver. A time differentiation approach to housing markets: A case study of Orange County, Florida. December: 393–402.

White, Pip. Residential housing market analysis: A turning points model. June: 147–56.

Housing Price Indexes

Hamilton, S. W., and David Dale-Johnson. Multiple listing service sales data as an indicator of market behavior: Prices, volume, and submarket activity. June: 175–97.

Income Elasticities

Anderson, John E. Property tax base income elasticities: Pooled estimation of partial and total income effects. June: 157–71.

Income Approach Models

Gloudemans, Robert J. MRA and the valuation of public service companies. March: 43–67.

Location Analysis

Ireland, Michael W., and Linda Adams. Transportability of a general-purpose residential market-calibrated cost model. June: 203–24.

Kinnard, William N., Jr., Philip S. Mitchell, Gail L. Beron, and James R.

Webb. Market reactions to an announced release of radioactive materials: The impact on assessable value. September: 283–97.
Marsh, Lawrence C., and Anthony B. Sindone. A calibration technique for estimating the effect of location on the values of residential properties. June: 261–76.
O'Connor, Patrick M., John G. Panos, and Siddhartha Som. Manhattan commercial property: Development and comparison of valuation models. March: 3–23.

Multiple Listing Service Data

Hamilton, S. W., and David Dale-Johnson. Multiple listing service sales data as an indicator of market behavior: Prices, volume, and submarket activity. June: 175–97.

Multiple Regression Analysis

Birch, John W., Mark A. Sunderman, and Thomas W. Hamilton. Estimating the importance of outliers in appraisal and sales data. December: 361–76.
Des Rosiers, Francois. RESIVALU: An hedonic residential price model for the Quebec region, 1986–87. June: 227–55.
Gloudemans, Robert J. Modeling commercial properties under various economic conditions. March: 25–41.
Gloudemans, Robert J. MRA and the valuation of public service companies. March: 43–67.
Ireland, Michael W., and Linda Adams. Transportability of a general-purpose residential market-calibrated cost model. June: 203–24.
Jensen, David L. Modeling time effects in computer-assisted mass appraisal. March: 95–123.
Kinnard, William N., Jr., Philip S. Mitchell, Gail L. Beron, and James R. Webb. Market reactions to an announced release of radioactive materials: The impact on assessable value. September: 283–97.
Marsh, Lawrence C., and Anthony B. Sindone. A calibration technique for estimating the effect of location on the values of residential properties. June: 261–76.
O'Connor, Patrick M., John G. Panos, and Siddhartha Som. Manhattan commercial property: Development and comparison of valuation models. March: 3–23.

Outliers

Birch, John W., Mark A. Sunderman, and Thomas W. Hamilton. Estimating the importance of outliers in appraisal and sales data. December: 361–76.

Price per Share Models

Gloudemans, Robert J. MRA and the valuation of public service companies. March: 43–67.

Price Trends

Soskin, Mark D., Bradley M. Braun, and William C. Weaver. A time differentiation approach to housing markets: A case study of Orange County, Florida. December: 393–402.

White, Pip. Residential housing market analysis: A turning points model. June: 147–56.

Property Tax Discount

Moffie, Robert P., and Tracy L. Williamson. An examination of factors affecting payment of property taxes within a discount period. December: 409–14.

Public Utilities, Valuation of

Gloudemans, Robert J. MRA and the valuation of public service companies. March: 43–67.

Railroads, Valuation of

Gloudemans, Robert J. MRA and the valuation of public service companies. March: 43–67.

Ratio Studies

Bell, Michael E., and John H. Bowman. Gauging assessment uniformity: A comparison of measures. December: 345–60.

Birch, John W., Mark A. Sunderman, and Thomas W. Hamilton. Determining the minimum sample size for assessment and reappraisal work. September: 299–311.

Birch, John W., Mark A. Sunderman, and Thomas W. Hamilton. Estimating the importance of outliers in appraisal and sales data. December: 361–76.

Bogart, William T. Economic implications of tax administration: Property assessment, equalization, and school aid in New Jersey. December: 377–92.

Residential Models

Borst, Richard A. Artificial neural networks: The next modeling/calibration technology for the assessment community. March: 69–94.

Des Rosiers, Francois. RESIVALU: An hedonic residential price model for the Quebec region, 1986–87. June: 227–55.
Ireland, Michael W., and Linda Adams. Transportability of a general-purpose residential market-calibrated cost model. June: 203–24.

Revaluation

Epstein, Sheldon, and Yonah Wilamowsky. The impact of a substantial shift in property taxes on the revaluation process. September: 331–44.

Sales Data

Hamilton, S. W., and David Dale-Johnson. Multiple listing service sales data as an indicator of market behavior: Prices, volume, and submarket activity. June: 175–97.

Sample Size

Birch, John W., Mark A. Sunderman, and Thomas W. Hamilton. Determining the minimum sample size for assessment and reappraisal work. September: 299–311.
Bogart, William T. Economic implications of tax administration: Property assessment, equalization, and school aid in New Jersey. December: 377–92.
Sherrill, Koren, and Elbert B. Whorton, Jr. Sample size estimation techniques of the state equalization study of school districts in Texas. March: 125–39.

Splines

Jensen, David L. Modeling time effects in computer-assisted mass appraisal. March: 95–123.
Marsh, Lawrence C., and Anthony B. Sindone. A calibration technique for estimating the effect of location on the values of residential properties. June: 261–76.

Stability of Assessments

Epstein, Sheldon, and Yonah Wilamowsky. The impact of a substantial shift in property taxes on the revaluation process. September: 331–44.

Tax Base, Predicting

Anderson, John E. Property tax base income elasticities: Pooled estimation of partial and total income effects. June: 157–71.

Tax Increment Financing

Silva, Donald. Municipal use of tax increment financing and school district burden. December: 403–8.

Tax Sales

DeBoer, Larry, and James Conrad. Property tax sales in Tippecanoe County, Indiana: Supply, demand, and investment analysis. September: 313–29.

Time-differentiation Method

Soskin, Mark D., Bradley M. Braun, and William C. Weaver. A time differentiation approach to housing markets: A case study of Orange County, Florida. December: 393–402.

Time Effects

Jensen, David L. Modeling time effects in computer-assisted mass appraisal. March: 95–123.

Transportable Models

Ireland, Michael W., and Linda Adams. Transportability of a general-purpose residential market-calibrated cost model. June: 203–24.

Uniformity

Bell, Michael E., and John H. Bowman. Gauging assessment uniformity: A comparison of measures. December: 345–60.
